Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ishikawa et al (10-47880 or 10-206060).

Claims 6-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Takashi et al (11-90530).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishikawa et al (10-47880 or 10-206060) in view of Takashi et al (11-90530).

Ishikawa et al (10-47880 or 10-206060) discloses all the claimed limitations except secondary grooves through the projected portions.

Takashi et al (11-90530) discloses a heat-transfer pipe (Figures 3-4) comprising a plurality of rows of grooves arranged in V-shaped patterns 52 and secondary grooves 52a for the purpose of improving heat exchange.

Since Ishikawa et al (10-47880 or 10-206060) and Takashi et al (11-90530) are both from the same field of endeavor and/or analogous art, the purpose disclosed by Takashi et al (11-90530) would have been recognized in the pertinent art of Ishikawa et al (10-47880 or 10-206060).

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Ishikawa et al (10-47880 or 10-206060) secondary grooves for the purpose of improving heat exchange as recognized by Takashi et al (11-90530).

Regarding claim 3, the secondary grooves 52a extend in a spiral direction 53.

Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishikawa et al (10-47880 or 10-206060) in view of Shikazono et al.

The device of Ishikawa et al (10-47880 or 10-206060) lacks secondary grooves on the projected portions.

Shikazono et al discloses a heat-transfer pipe (Figure 30) comprising a plurality of rows of grooves arranged in V-shaped patterns 1004 and secondary grooves 1002U for the purpose of improving heat exchange.

Since Ishikawa et al (10-47880 or 10-206060) and Shikazono et al are both from the same field of endeavor and/or analogous art, the purpose disclosed by Shikazono et al would have been recognized in the pertinent art of Ishikawa et al (10-47880 or 10-206060).

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Ishikawa et al (10-47880 or 10-206060) secondary grooves for the purpose of improving heat exchange as recognized by Shikazono et al.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a)

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
